MEDICAL INSURANCE MAY NOT BE ENOUGH. THAT'S WHY YOU NEED *Aesthetisure* FOR YOUR PLASTIC SURGERY PROCEDURE.

Complications after cosmetic surgery are rare, but they can occur as with any type of surgery. The majority of major medical health insurance policies exclude treatment of medical complications that are a result of an elective cosmetic surgical procedure.

Aesthetisure is an affordable solution that can assist you with the possible financial burden of unexpected complications following an elective cosmetic surgery. While there are other programs available, *Aesthetisure's* experienced team, level of customer service and proven technology make it the right choice.

Aesthetisure is exclusively available to board certified surgeons and candidates for membership who have passed their written boards, and is available across the United States. When a surgeon becomes active in the program, all of his/her patients having one or more of the covered procedures are eligible to receive benefits should a covered complication occur.

With *Aesthetisure*, you have peace of mind, knowing that your surgeon has taken the precautionary steps to cover you in the event of an eligible loss.

GO IN CONFIDENT Selecting a surgeon, like yours, who is board certified, is one of the best ways to be assured of a positive experience and successful outcome following cosmetic surgery. Your surgeon is also one of a highly select group qualified to provide you with the added assurance of *Aesthetisure*.

All types of surgery carry with them some degree of risk. *Aesthetisure* was developed to provide you with insurance coverage in the unlikely event that you have specific complications within 45 days* of surgery and are admitted to an accredited treatment facility such as a hospital, ER or surgical center. This is an important benefit to you since most traditional health insurance plans do not cover such occurrences.

Visit Aesthetisure.com for complete information about types of eligible procedures and coverage details.
